PROFILE

I started in the world of programming at the age of fifteen and later studied systems engineering. I currently have eight years of professional experience in web application development. I am passionate about technology and innovation, so I am always in constant learning and developing new skills. I have worked both independently and with various clients, receiving praise for my efficiency, work capacity, and commitment to quality.

HOBBIES

Traveling

Photography

Video games

Front-End Developer
Freelancer, Remote

Development of informational websites, API consumption, and participation in the development of an office rental system.

📦 PROJECTS

Criptomonedas.es - At the request of a client, I was in charge of creating a web application for criptomonedas.es. The application is planned to go into production in 2025.

MayaJs - It is a tool of my own that works as a generic back-end and eliminates the time required to program the operations of registration, updating, deletion, paginated and ordered search. It will go into production along with criptomonedas.es.

🚀 SKILLS

Typescript/Javascript

Angular

HTML5 & CSS

C# / .Net

NodeJS / Nest Framework

Mysql / Sql Server
